

Office of the Secretary, Commerce

§ 10.4

costs. Estimated annual costs will be based on an hourly rate for salary and overhead established by the Department for the National Institute of Standards & Technology's administrative and technical support services plus estimates of direct costs to provide funds for such items as the travel of consumer representatives unable to otherwise attend committee meetings, travel for Department staff, and printing costs. Project funds will be reviewed annually. Excess funds may be refunded or applied to the next accounting period. Should funds from deposits be inadequate during an accounting period, work on the project will continue only if funds are restored to a level estimated adequate to complete the 12-month period.

[51 FR 22497, June 20, 1986, as amended at 55 FR 38315, Sept. 18, 1990]

§ 10.3 Development of a proposed standard.

(a) A proposed standard as submitted to the Department:

(1) Shall be based on adequate technical information, or, in the case of size standards (including standards covering the quantities for packaged consumer commodities), on adequate marketing information, or both, as determined to be appropriate by the Department;

(2) Shall not be contrary to the public interest;

(3) Shall be technically appropriate and such that conformance or non-conformance with the standard can be determined either during or after the manufacturing process by inspection or other procedures which may be utilized by either an individual or a testing facility competent in the particular field;

(4) Shall follow the format prescribed by the National Institute of Standards & Technology. (Copies of the recommended format may be obtained from the Office of Product Standards Policy, National Institute of Standards & Technology, Gaithersburg, Maryland 20899.);

(5) Shall include performance requirements if such are deemed by the Department to be technically sound, feasible, and practical, and the inclu-

sion of such is deemed to be appropriate;

(6) May include dimensions, sizes, material specifications, product requirements, design stipulations, component requirements, test methods, testing equipment descriptions, and installation procedures. The appropriateness of the inclusion in a standard of any particular item listed in this subparagraph shall be determined by the Department; and

(7) Shall be accompanied by rational statements pertaining to the requirements and test methods contained in the standard, if deemed necessary by the Department.

(b) A proposed standard that is determined by the Department to meet the criteria set forth in paragraph (a) of this section may be subjected to further review by an appropriate individual, committee, organization, or agency (either government or non-government, but not associated with the proponent group).

(c) A proposed standard may be circulated by the Department to appropriate producers, distributors, users, consumers, and other interested groups for consideration and comment as well as to others requesting the opportunity to comment.

(d) The proponent group or appropriate committee which drafted the initial proposal under § 10.1(d) shall consider all comments and suggestions submitted by the reviewer designated under paragraph (b) of this section, and those received by the Department as a result of any circulation under paragraph (c) of this section, and may make such adjustments in the proposal as are technically sound and as are believed to cause the standard to be generally acceptable to producers, distributors, users, consumers, and other interested parties. The proposal will then be submitted to the Department for further processing.

[51 FR 22497, June 20, 1986, as amended at 55 FR 38315, Sept. 18, 1990]

§ 10.4 Establishment of the Standard Review Committee.

(a) The Department shall establish and appoint the members of a Standard Review Committee within a reasonable

§ 10.5

15 CFR Subtitle A (1–1–10 Edition)

time after receiving a proposed standard. The committee shall consist of qualified representatives of producers, distributors, and users or consumers of product for which a standard is sought or any other appropriate general interest groups such as State and Federal agencies. When requested by the Standard Review Committee, the Department shall appoint one voting member from among the representatives of the Federal agencies, other than the Department of Commerce. All other representatives of Federal agencies on the Standard Review Committees shall be advisory nonvoting members. (Alternates to committee members may be designated by the Department.) When deemed appropriate by the Department, project funds under §10.2 may be made available to assure participation by consumer interests on the committee at required meetings.

(b) A Standard Review Committee may remain in existence for a period necessary for the final development of the standard, or for 2 years, whichever is less.

(c) The Department shall be responsible for the organization of the committee. Any formal operating procedures developed by the committee shall be subject to approval by the Department. The committee may conduct business either in a meeting or through correspondence, but only if a quorum participates. A quorum shall consist of two-thirds of all voting members of the committee. A majority of the voting members of the committee participating shall be required to approve any actions taken by the committee except for the action of recommending a standard to the Department, the requirements for which are contained in §10.5(b).

§ 10.5 Development of a recommended standard.

(a) The Standard Review Committee, with the guidance and assistance of the Department and, if appropriate, the reviewer designated under §10.3(b), shall review a proposed standard promptly. If the committee finds that the proposal meets the requirements set forth in §10.3(a), it may recommend to the Department that the proposal be circulated for acceptance under §10.6. If,

however, the committee finds that the proposal being reviewed does not meet the requirements set forth in §10.3(a), the committee shall change the proposal, after consulting with the proponent group, so that these requirements are met, before recommending such proposal to the Department.

(b) The recommendation of a standard by the Standard Review Committee shall be approved by at least three-quarters, or rejected by more than one-quarter, of all of the members of the committee eligible to vote. The voting on the recommendation of a standard shall be conducted by the Department if conducted by letter ballot. If such voting is accomplished at a meeting of the committee, the balloting shall be either by roll call or by signed written ballot conducted by the Department or the chairman of this committee. If conducted by the chairman, a report of the vote shall be made to the Department within 15 days. If the balloting at the meeting does not result in either approval by at least three-quarters of all members (or alternates) eligible to vote (whether present or not), or rejection by more than one-quarter of the members (or alternates) or the committee eligible to vote, the balloting shall be disregarded and the Department shall subsequently conduct a letter ballot of all members of the committee.

(c) Any member of the committee casting a negative ballot shall have the right to support an objection by furnishing the chairman of the committee and the Department with a written statement setting forth the basis for the objection. The written statement of objection shall be filed within 15 days after the date of the meeting during which the voting on the standard was accomplished, or, in the case of a letter ballot, within the time limit established for the return of the ballot.

(d) At the time a recommended standard is submitted to the Department, the Chairman of the Standard Review Committee shall furnish a written report in support of the committee's recommendation. Such report shall include a statement with respect to compliance with the requirements as established by these procedures, a discussion of the manner in which any
